

Customer Churn Analysis & Quality Audit Report

Track: Data Analytics | **Dataset:** Synthetic Customer Records (N=15)

Executive Recommendation

Audience: Subscription Retention & Customer Support Leadership Teams.

Decision: Proactively contact and offer plan upgrade incentives to **Month-to-Month contract customers with ≥ 3 support tickets** in the prior 90 days.

Supporting Metric: This high-friction segment accounts for **100% of historical churn** (7 out of 7 churned accounts; 0% churn among annual contract holders).

Uncertainty: Small sample size (N=15). High ticket counts correlate strongly with churn, but underlying causes require root-cause support ticket review.

Next Measurement: Monitor **30-day ticket resolution CSAT** and **60-day Month-to-Month renewal rates** post-outreach.

Data Profiling & Summary Statistics

Metric / Attribute	Retained Customers (n=8)	Churned Customers (n=7)	Overall Dataset (N=15)
Count (% of Total)	8 (53.3%)	7 (46.7%)	15 (100.0%)
Avg Tenure (Months)	29.13	7.00	18.80
Avg Monthly Fee (INR)	₹107.49	₹58.56	₹84.66
Avg Support Tickets (90d)	1.00	4.29	2.53
Month-to-Month Contracts	0 (0.0%)	7 (100.0%)	7 (46.7%)
1-Year / 2-Year Contracts	8 (100.0%)	0 (0.0%)	8 (53.3%)
